Abdelrahman Walid Elmarsafawy

Junior Front-End Engineer

Email: abdelrahmanbo390@gmail.com

Phone: +02 1020899457 / +02 1227986495

Summary

First-year Computer Science student at Open Arab University, Egypt branch, pursuing a Bachelor's degree, with three years of programming experience. I specialize in building large-scale, high-performance, and maintainable websites. My strong programming fundamentals enable me to quickly learn new languages and technologies.

I am focused on excelling in computer science and aspire to become a Microsoft Ambassador.
I took Applied Calculus in high school, and additionally, and I took Applied Calculus again this semester (first semester).

Education

High school: 2021 - 2024

Bachelor's in Computer Science: 2024 - 2028
Open Arab University, Egypt.
Relevant courses:

- Applied Calculus

Technical Skills & Expertise

Programming Languages: Python, JavaScript, TypeScript, HTML, CSS, SCSS

Frameworks: React Native, React, Firebase, Node.js

Libraries & Tools: Leaflet.js, Socket.IO, Git, GitHub, VS Code

API Authentication: Secure API authentication using random token generation.

Debugging: Browser developer tools to identify and resolve issues in web applications.

API Testing: Postman to test API endpoints, ensuring functionality.

Self-Led Projects

For the past two years - now

For the past two years, I improved my skills in several front-end projects, which I have showcased on my portfolio website: https://abdelrahman390.github.io/portfolio
Examples include:

- **To-do list with Firebase database -** (HTML - CSS - SCSS - JavaScript - Firebase Database)**:** In this web app, I integrated Firebase to store user data, allowing access to the app from any device. Features:

◊ A main task with nested subtasks as needed.

◊ Features include a login system, task nesting, editing, deletion, timestamps, and custom JavaScript logic for displaying cards.

- **Laps calculator app -** (HTML - CSS - JavaScript) **:**

◊ Solved the challenge of calculating lap times during track training.

◊ Developed a lightweight, user-friendly app using HTML, CSS, and JavaScript.

◊ Enhanced usability and provided an efficient solution for real-world problems.

- **Chat app with Firebase Real-Time Database -** (HTML - CSS - SCSS - JavaScript - TypeScript - Firebase Realtime Database):
  - ◊ This application was built to explore database functions in real-time.

- **React Native Chat app with Firebase Real-Time Database -** (HTML - CSS SCSS - React Native - TypeScript - Firebase Realtime Database - Django - NodeJS - Socket.io):
  - ◊ API security between server and Front-end by a random token authentication.
  - ◊ Back-end: Django server for statice APIs, NodeJS and Socket.io For real-time communication between server and front-end. Currently working on backend input validation and optimizing performance.

Work Experience

Junior front-end engineer - modeem.org.sa - freelance from Egypt

May 2023 — August 2023

About the company: Madeem Digital Association specializes in building custom digital platforms for nonprofits, aiming to digitize operations. We also provide platform development, data management, server management, and UX design to help nonprofits enhance their impact, supporting Saudi Arabia’s Vision 2030.

My role in the company: Translating Figma designs into responsive HTML, CSS, SCSS, and JavaScript code. Developed two large-scale websites, each with nearly 50 pages, and developed interactive maps using Leaflet.js, enabling users to drag and drop their location for dynamic positioning and mapping. Optimized JavaScript code for debugging efficiency and enhanced performance, reducing debugging time by 70% to 80%. Ensured ideal integration with the back-end Odoo system by collaborating closely with the back-end team.

Recognizing the challenges of large-scale projects, I proactively learned React to improve code efficiency and maintainability. I've successfully migrated a part of one website to React, demonstrating my ability to apply new technologies and enhance project outcomes.

Volunteering

Front-End Web Developer | Microsoft Student Team - AOU (Web Team Member)

Oct 2024 - Now

Projects I participated in:

— Web course

October 3 - October 31

As a front-end assignments corrector in the Microsoft student team, I provided feedback on students' web development projects in the course developed by our team. I proposed adding an introduction to Git and GitHub to help students become more proficient in version control and teamwork, which was approved by the team leaders. I developed the materials for this introduction and taught students how to use Git and GitHub effectively, a Microsoft-acquired platform. Fortunately, these Git and GitHub materials have been well received by all the technical teams in the Microsoft Student Team at Arab Open University, and they will be shared with all our students.

Additionally, I suggested introducing a group-based final project in addition to the individual one. This extra project aimed to simulate real-life teamwork by having students collaborate using Git and GitHub, ensuring they gained practical experience working in teams. Unfortunately, this idea was not implemented due to the limited time we had, but I hoped it would help students develop essential professional skills for the future.

Technical Team member | AOU ICPC Community

Dec 2024 - Now

We will start around March 2025 to help AOU students who want to participate in the ICPC challenge in 2025 and assist them with difficult problem-solving challenges in C++.

Additionally, I have participated in some student and technology events, including:

- TEDx Youth MC - June 17, 2022
- Build Your Future - July 29, 2022
- RTI Event - July 1, 2022
- Techne Summit - Oct 5, 2024
- Google DevFest Cairo '24 on Saturday, December 7, 2024.

Languages:

- Arabic (Native or bilingual proficiency)
- English (Excellent proficiency)
- German (beginner)

Recommendations:

2 people have recommended Abdelrahman Walid Elamarsafawy

Recommendations link: https://www.linkedin.com/in/abdelrahman-walid-elmarsafawy-4b1b94223/details/recommendations/

“As a technical team leader, I was very happy to manage Abdelrahman Walid, and he consistently exceeded expectations. He brought strong technical skills in frontend development, especially JavaScript, a proactive attitude, and excellent teamwork. His ability to solve problems efficiently and collaborate with other teammates gives great value to the products we make. I highly recommend Abdelrahman Walid for any future opportunities—they will be a great addition to any organization.”

— Shaimaa Osama El-Marsafawy, Odoo Team Leader - Shaimaa managed Abdelrahman walid directly.

“Abdelrahman is a talented frontend developer with a great eye for detail and user-friendly design. He deliver high-quality work on time and are a pleasure to collaborate with. I highly recommend him to anyone looking for a skilled and dependable frontend developer!”

— Senior Odoo Developer @ Singleclic Ltd , Mahmoud was senior to Abdelrahman walid but didn't manage Abdelrahman walid directly.
